MDLIVE allows for families to avoid long waits and eliminates cost associated with potentially unnecessary visits to the ER or Urgent Care. It provides access to a doctor when your family doctor is unavailable. This national network is available 24/7, including holidays, to provide quality, affordable care.

How It Works

By Phone:

- Member calls the toll-free hotline that is available 24/7/365
- A care coordinator evaluates the health issue to determine if telehealth is appropriate and redirects the patient to a doctor if appropriate
- Once an available provider is located, the system automatically calls and connects the member with a doctor

By Video Conference:

- Member signs into the website and signs in using their username and password
- The system helps the member to determine if telemedicine is appropriate
- The system searches for a provider using criteria such as specialty, language, gender, and location
- Once an available provider is located, the system automatically connects the member and doctor via the online portal

Doctor Access

MDLIVE doctors are always on call, including nights and weekends. No more waiting days or even weeks to see your doctor.
